# DIFFERENT MATERIALS

What materials are these objects made of? Use the word box and write the answers on the lines.

Wood

Glass

Clay

Rubber

\_\_\_\_\_

\_\_\_\_\_

\_\_\_\_\_

## Fun Fact!

Ceramic is made from a mixture of clay, water, and other earth materials. It is then fired in a kiln (a type of oven) at a high temperature to make objects like the one under this box!

# DIFERENTES MATERIALES

What materials are these objects made of? Use the word box and write the answers on the lines.

¿De qué materiales están hechos estos objetos? Usa el cuadro de palabra y escriba las respuestas en las líneas.

Wood  
Madera

Glass  
Vidrio

Clay  
Barro

Rubber  
Hule/Goma

## Fun Fact!

La cerámica está hecha de una mezcla de arcilla, agua y otros materiales de la tierra. Luego se cuece en un kiln (un tipo de horno) a una temperatura alta para hacer objetos como el que está debajo de esta caja!

# UNA TARJETA POSTAL A CASA A POSTCARD HOME

Pretend you are writing a postcard home to a friend from this place, and describe what is happening around you.

Imagina que estás escribiendo una tarjeta a casa para un amigo/a. Describe lo que está ocurriendo a su alrededor.

What are the sights, smells, sounds, and flavors of this place? Why would you have visited there?

¿Cuáles son los las vistas, olores, sonidos, y sabores de este lugar? ¿Por qué has visitado allí?

Japanese, Mt. Fuji from Utome Toge, 1865-75, albumen print and hand colored, Gift of the Wellesley College Art Department Slide Library 1983.24.123

# Volume of rectangular objects

---

Solve the word problems using the formula for volume:  $L \times W \times H$

1. This sculpture is 10 inches long, 19 inches wide, and 9.5 inches tall. What is the volume of the object?

2. This stone block is 8 inches tall, 6.5 inches long, and 12 inches wide. What is the volume of the sculpture?

3. This sculpture is 70.5 inches long, 30 inches wide, and 16 inches tall. What is the volume of the object?
