

Quantitative Analysis Institute: Propensity Score Matching

Cassandra Pattanayak, Guthman QAI Director

Monday, May 19, 1:30 pm

Clapp Library Lecture Room (1st floor)

This talk will cover the basics of the Rubin Framework for causal inference, with a focus on the conceptual and practical details of propensity score matching. The importance of assessing balance between treatment groups on background variables will be emphasized. Approaches to matching will be illustrated using a data set from the Centers for Disease Control and Prevention.

Please join us for the talk, discussion, and refreshments.
